

Spandrel Inspection

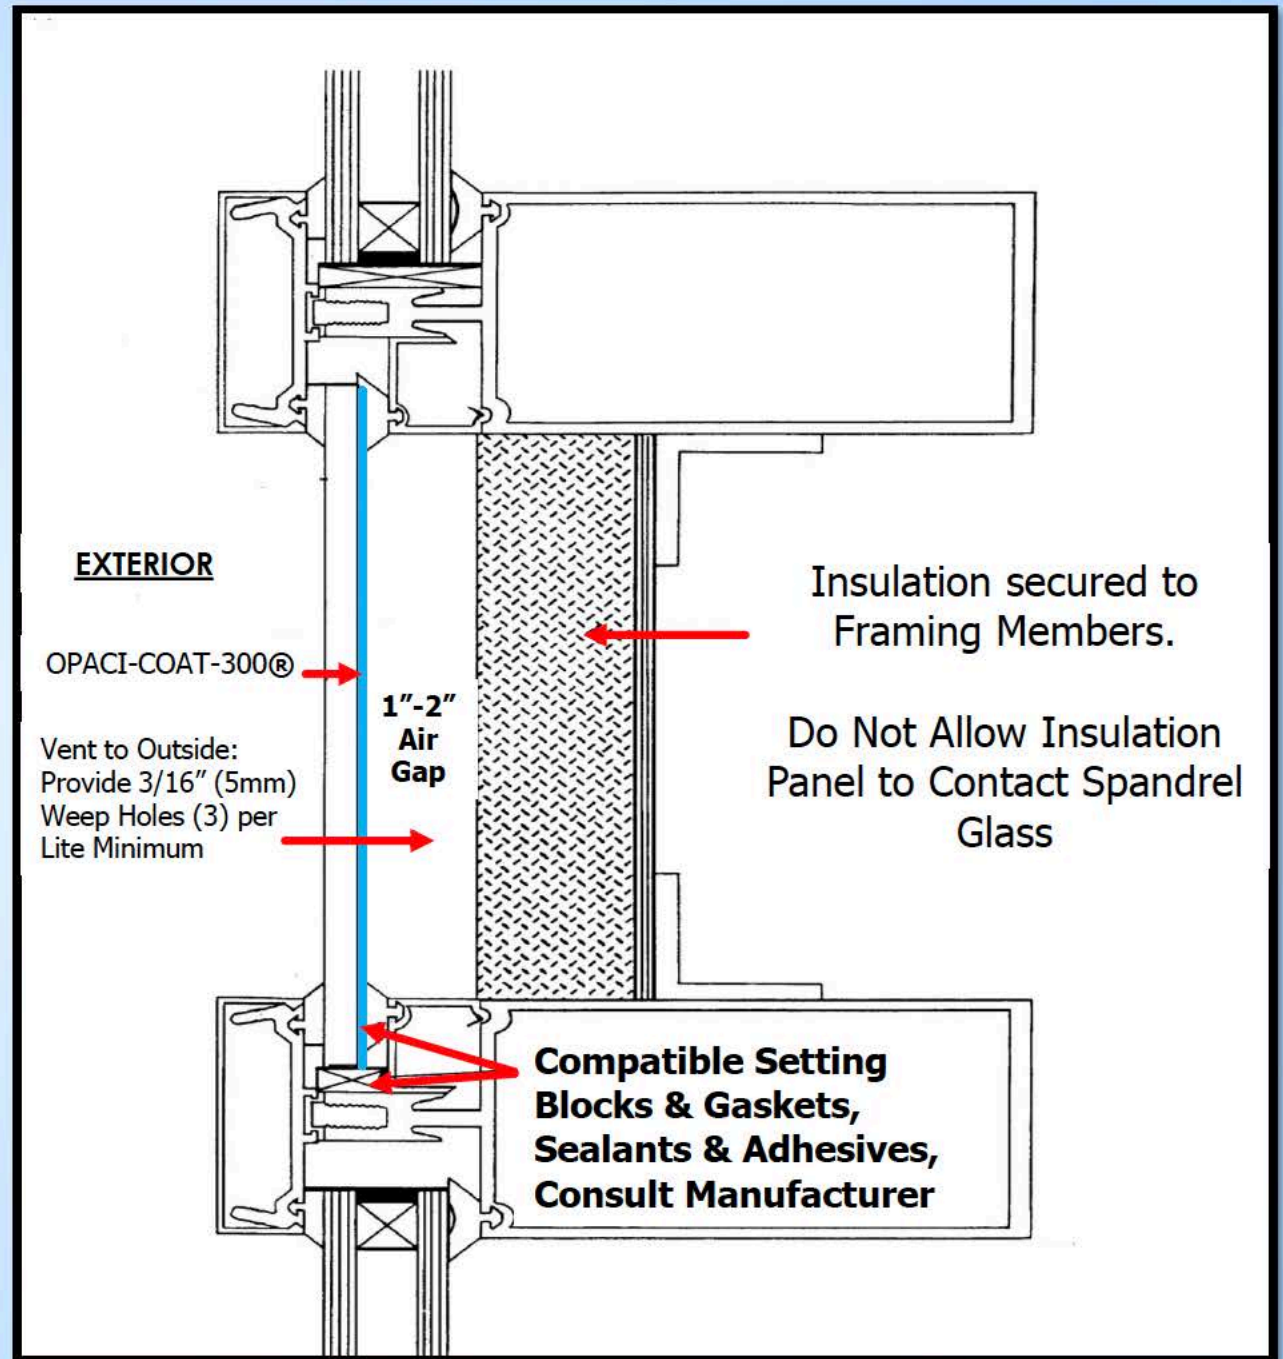

All spandrel coatings are subject to the same viewing criteria:

ASTM C 1048

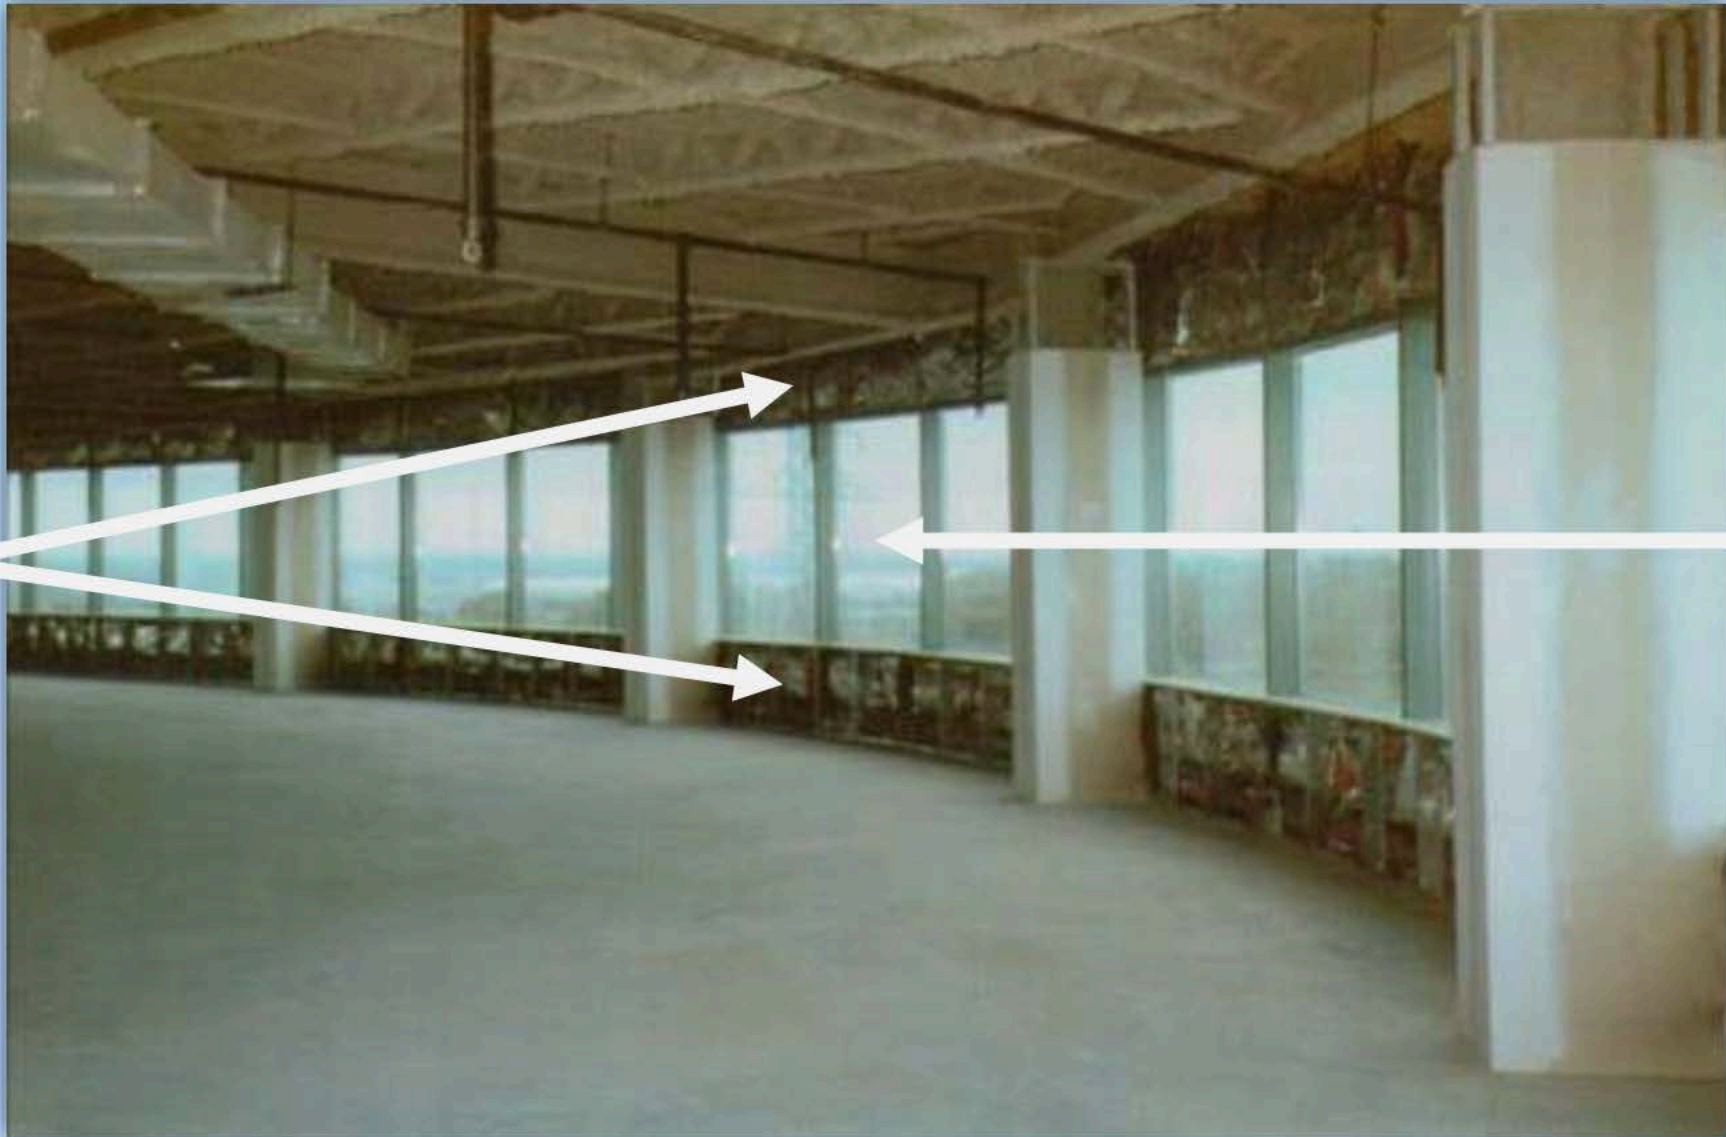

Monolithic Glass Spandrel with OPACI-COAT-300®

IGU detail has similar recommendations

Non-Vision and Cavity-Backed Areas Only

These are examples of a coated glass product incorrectly specified and installed in a vision area.

These coatings are meant to be installed with opaque backup construction in non-vision and cavity-backed areas only.

When Cavity Backed:
